

Use your SmartCurrents™ thermostat to **maximize** **bill savings**

Set up your ecobee Smart Thermostat Premium and save more, automatically.

You can adjust your thermostat's settings to fit your preferences and increase your savings.

- **Comfort Settings.** Your thermostat allows you to select Comfort Settings for heating or cooling your home in three modes: **Home**, **Sleep**, and **Away**. Set a single preferred temperature for each mode.
- **Schedule Assistance.** Your thermostat learns your routine and recommends changes to your thermostat schedule to better match your lifestyle.

To program these settings on the thermostat, go to the **Main Menu** and select **Schedule** or **Comfort Settings**. You can also program these settings using the ecobee mobile app or web portal.

For full instructions, visit support.ecobee.com

What else can your thermostat do for you?

Setting a consistent temperature can help your home and your wallet.

Suggested Comfort Settings

Away  64  82

Home  68  78

Sleep  67  80

Consider capping your Comfort

Settings for cooling at 78 degrees in the summer and heating at 68 degrees in the winter. You can also adjust the temperature even more when you are sleeping or away.

Your thermostat comes with eco+ automatically enabled, which works in the background to optimize efficiency and comfort in your home. Your ecobee smart thermostat can help you save up to 26% annually on heating and cooling costs* through intelligent energy efficiency features and occupancy detection to help you save more when you're not home.

Take advantage of eco+ Time of Use assistance to save more.

The eco+ Time of Use feature intelligently pre-cools and pre-heats your home when energy is less expensive. If you are on a Time of Day rate, enable the Time of Use feature from the eco+ settings in your ecobee app. Ensure you have DTE selected as your utility provider and that you've selected your current rate from the drop-down list of options.

Your thermostat also offers advanced control options.

Control your thermostat from anywhere for ultimate convenience. You can interact with your thermostat through your smartphone, tablet, or Apple Watch.

It is also compatible with smart home systems like the Apple HomeKit, Amazon Alexa, Google Assistant, SmartThings, and IFTTT.
